Detailed Action

EXAMINER'S AMENDMENT

Authorization for this examiner's amendment was given in a telephone interview with Mr. Patrick Burns, (312) 360-0080, on January 4, 2007.

The application has been amended as follows:

Claim 31 is cancelled.

Reasons for Allowance

1. Claims 1-30 are allowed.
2. The following is an examiner's statement of reasons for allowance. The prior art does not teach nor reasonably suggest, as recited in claims 1, 16, ~~and 31~~ a judgment unit **that judges whether gyroscopic moment of the spindle is out of a predetermined range; and** a control unit **that controls the position of the head to compensate for the inclination of the spindle upon a judgment by the judgment unit that the gyroscopic moment is out of the predetermined range.** The unique feature is that the gyroscopic moment is being calculated in order to accurately position the head. Whereas, other head positioning apparatus are using a Cartesian coordinate system to monitor the position of a fixed element.
3. The closest prior art is Takaishi (USPub 2004/0001273) shows a head position control apparatus that controls a position of a head that performs read and write of information with respect to a medium rotated and driven by a spindle, the spindle including a hydrodynamic bearing, but does not show a judgment unit that judges whether gyroscopic moment of the

spindle is out of a predetermined range; and a control unit that controls the position of the head to compensate for the inclination of the spindle upon a judgment by the judgment unit that the gyroscopic moment is out of the predetermined range.

These features, in combination with the other features of Claims 1,16, and 31 are not anticipated by, nor made obvious over, the prior art of record.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
